

Scoop up happiness by pure silver spoon

〈Material and Tool〉

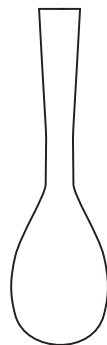

- Art Clay Silver 7 g
- Stainless brush
- Sponge sanding pad (red:#320)
- Cooking sheet
- Straw (Diameter is 5 ~ 6mm)
- Toothpick
- Measuring Spoon

Start making after you learn the way of firing, drying, using silver clay from the project sheet.
Once clay gets dried, work with your finger moisturized a little

How to make

1 Rolling Art Clay silver on the cooking sheet.

Template

2 Make the clay' s shape like the template and push the top of spoon to be flat.

3 Shape the top of spoon to be round using the back of measuring spoon.

4 Attach the handle of spoon part around the straw to make the hole for string.

5 Attach the joint part using toothpick with a little water and dry it.

6 After complete drying, smooth the surface by sponge sanding pad.

7 After firing, finish with a stainless steel brush.

*Be careful handing dried silver clay, because it is fragile when it's dried.

Silver is No.1 thermal conductivity among metal, which makes scooping ice cream easier!
