

# UV Perfume Pendant

ART CLAY™

## Materials and tools

- Art Clay Silver Clay Type (20g)
- Art Clay Silver Paste Type (small amount)
- UV crystal resin
- Art Clay Original Ring mold texture ring (F-1765)
- Your favourite stones or objects (For UV inclusion)
- Chain
- Wet and dry sandpaper
- Sponge sanding pad (#600,1200,2000)
- Steel Scraper
- File
- Tools for molding and firing

## Steps to make

1. Apply a food oil on the mold. Roll Art Clay Silver Clay Type to rope shape and push into the mold to have it textured. Take it out from the mold while the clay is soft.

2. Cut the clay into 18mm x 6mm plate and make 4 of them, and dry.

3. File the edge of the plate diagonally with a file, where will be a join corner. Attach those plates with Paste Type to make a frame and dry it.

4. Apply a sandpaper to make flat surface on the front and back.

5. Make an 8mm triangular prism with Clay Type. Drill with a 3mm drill bit through the prism.

6. File down in-between the bottom part of prism for chain bail.

7. Attach the prism to the frame with Paste Type.

8. Apply first layer of UV crystal resin after attaching a plastic tape on one side of the frame. Cure the resin in UV light. Averagerly, it takes 2~3 mins to be hardened.

9. Apply another layer of UV crystal resin, and place the stones or objects in the resin and cure it. Cover with final layer of resin and cure it.

10. Use wet and dry sandpaper to polish down the UV resin to the silver surface level. When you use sandpaper, use in order of #600, 1200, and 2000 grids. Polish with a silver polish and polishing cloth to complete.  
\*Wear a protection mask to avoid inhaling resin dust.

11. Put a silver chain through the bail to complete.
